

Term 1 Home Learning Project.

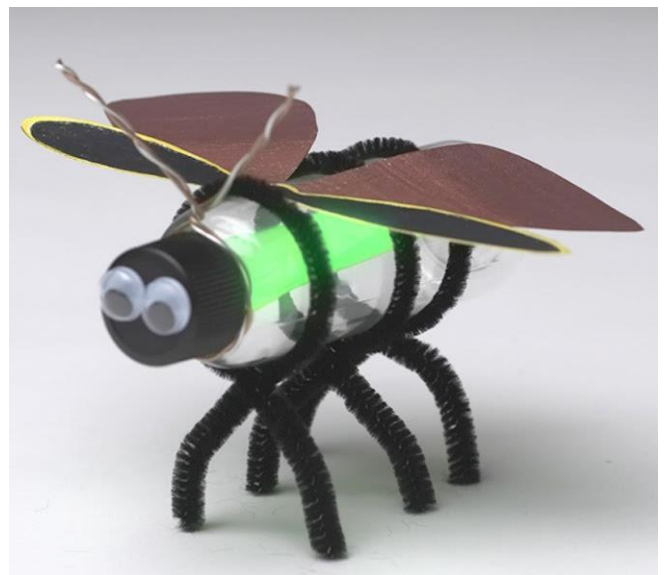

During term 1, year 1 have been learning all about flight.

We have learnt about flying things, both natural and man-made. We have learnt about the view from an aeroplane and studied aerial photographs. We have learnt about the history of flight, the Wright brothers and how planes have changed over time.

To further enhance their learning, we are inviting children to complete one or more of the following challenges:

Challenge 1

Develop your creativity by designing and making your own fantastic flying machine or animal. You could make a hot air balloon and basket to hold your favourite teddy. Create a model of an aeroplane from Lego or junk modelling materials or make your own flying insect.

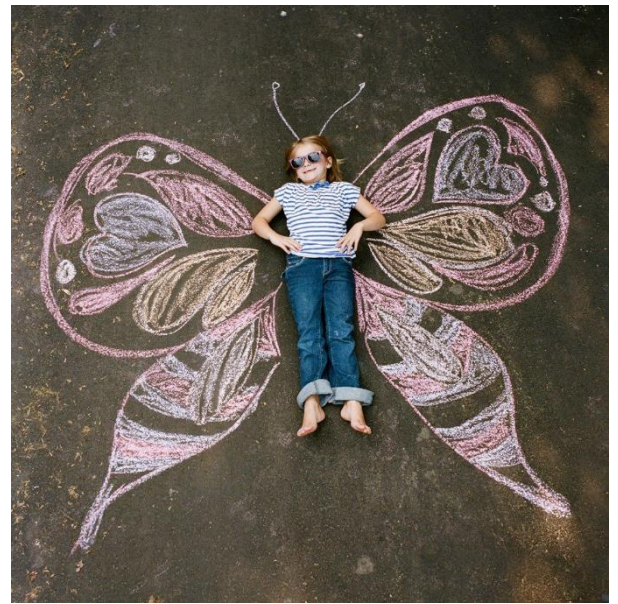

Challenge 2

Explore your locality

Go on a flying hunt. Can you find anything that flies in nature? E.g. butterflies, sycamore keys.

Take photos or draw different flying things that you find.

Challenge 3

Develop your research skills.

See how much information you can find out about the Wright brothers and their plane.
